### **NELI-VAQUEZ-ROWLAND, OUTSTANDING CONTRIBUTION TO HUMANITY, ILLINOIS**

Neli-Vasquez is a first generation American and grew up in an 'at risk' community called 'Little Village' a quaint, but densely populated Latino enclave, commonly known for the high rate of crime, due to drugs and gangs and for serving as the home of the largest County prison in the Country known as Cook County prison. She was the first in her family of seven to graduate from college. She is a former investment banker and for 13 years she worked for some of the leading investment banking firms in the Country. Neli Vasquez-Rowland is the Co-Founder & President of A Safe Haven Foundation. Inspired by a personal experience of alcoholism in their family and in her native community and frustrated by the lack of efficiencies and high fragmentation of services, that resulted in exorbitant costs to society and lost lives, it was during her tenure as an investment banker that she and her husband, Brian Rowland co-founded, A Safe Haven as a way to give back. A Safe Haven is a world class, unique, vertically integrated 'eco- system' non-for profit that is successfully rebuilding lives from poverty and homelessness. A Safe Haven's model is a public/private collaboration that assesses and addresses the root causes of poverty and homelessness with an individualized, integrated, comprehensive approach to social and economic crisis. A Safe Haven offers a holistic, sustainable, evidence-based approach including transitional and supportive housing, addiction treatment, education, and job training/placement. A Safe Haven also believes in renewing communities by investing in dozens of distressed, abandoned and repurposes properties in high-risk communities and creates award winning beautiful places and safe environments for residents to live and work to rebuild their lives. Due to many employment and housing barriers, A Safe Haven alumni faced early on, A Safe Haven also partners with for profit entities and Neli Vazquez-Rowland continues to personally invest along with other investors in businesses that create jobs to provide employment and permanent housing through social business enterprises and affordable housing development. Since 1994, the collective impact of the public/private partnership efforts has resulted in A Safe Haven helping the vast majority of over 44,000 people, including families, veterans, and today over 4,000 people each year, break the cycle of poverty and achieve financial independence with their pride, purpose and dreams restored. A Safe Haven Foundation's model empowers individuals to transform their own lives and contribute to society.

Specializing in  
Radiological Reports  
for Medical-Legal Cases

## Accurate reports lead to better outcomes.

Specifically designed to improve accuracy, reliability and accountability in workers' compensation cases, AIM Reports:

- Provide the required anatomical impairment measurements using a standardized evaluation protocol and present them in easy-to-read summary tables so that they may be incorporated in the impairment evaluation by the PTP, AME or PQME.
- Assess ratable impairment according to anatomical measurements for the cervical spine, thoracic spine, lumbar spine, hip, knee, ankle and wrist
- Meet the criteria required by the Workers' Compensation system of the State of California.
- Provide physicians with a properly Ratable Impairment Report that even cites relevant text from the *AMA Guides*.
- Ensure that attorneys have the proper information to present a completely accurate, objective and irrefutable case.
- Enable patients to get appropriate disability compensation for their injuries based upon the most accurate impairment rating.

# About Us

## Taking AIM at the Medical-Legal Process

The workers' compensation system relies upon "Medical-Legal" evaluation process to insure appropriate benefits are provided to injured workers. This process has long been hampered by incomplete and inaccurate evaluations often based on suboptimal radiological reports. As a result injured workers have experienced getting proper medical treatment and appropriate disability benefits.

The sole objective of AIM Radiology Group is to address these problems. We serve the workers' compensation community by providing detailed analyses of radiological studies and provide reports that document critical diagnostic information which has often been overlooked. This helps to insure that the injured workers receive appropriate benefits.

AIM stands for *Anatomical Impairment Measurements*. Providing accurate measurement based assessments of anatomical impairments is what we are all about. Labor Code sections 4660 and 4660.1 require the measurements set forth in the *AMA Guides 5th Edition* be performed in workers' compensation cases.

Drawing on our extensive expertise in this area, we have developed proprietary technology for analyzing data from radiological studies (primarily X-rays and MRIs), and our AIM Reports provide the most objective and accurate impairment assessments based on the required anatomical measurements.

# AIM Report

The AIM Report uses proprietary software-driven analysis to provide all of the anatomical measurements required by the Fifth and Sixth Editions of the *AMA Guides to the Evaluation of Permanent Impairment* for assessment of musculoskeletal injuries. Performing these measurements "by hand" can be difficult and time-consuming. The AIM Report provides these measurements for physicians in an easy-to-read format and is an integral component of any impairment evaluation involving the spine, wrists, hips, knees or ankles. Combined with the evaluating physician's clinical assessment, the AIM Report helps to ensure that the impairment evaluation will be accurate and complete as required by the *AMA Guides*.
