

MAPP (Minnesota Association of Pakistani physicians) continues to grow and many physicians and non-physicians in the community are becoming involved in our activities.

We held a fundraiser for HDF and raised funds for a school project in a small village of Pakistan.

MAPP has been actively participating in national health day care regularly over past few years now.

As MAPP president I was also a member of "committee for APPNA national health day" and actively participated in preparing for the annual event last year. I am also excited to be part of "APPNA membership committee" for 2017 and hope to work hard in helping increase membership of APPNA and MAAP Insha'Allah
