

Candidacy for APPNA BOT is a distinct honor and privilege for me, as it will enable me to play my part to run this organization as a professional society with equal opportunities for every member, where decisions are made for collective good beyond any personal benefits. I truly believe APPNA has the potential to support its members and use their collective wisdom and strengths to make this world a better place to live.

My involvement with APPNA started in 2006 (life time member since then) through my alumni. I wanted to get involved in social services not only here but also in Pakistan, especially wanted to pay back, I very quickly realized I need help of all the good friends, and with the help of these friends was very successful in turning the alumni into the most vibrant alumni in APPNA, now the future leaders are managing the budget of hundreds of thousands dollars every year, available to spend on projects of collective good both here and in Pakistan through our alumni. I am still actively involved as the member of BOT, AIMCAANA.

I also served as Chair of APPNA publication committee twice 2015 and 2017 and wins the accolades of several members in documenting loads of good that APPNA, alumni associations, component societies and its chapters are doing not only in Pakistan but also in their adopted communities (Annual Journals are available on website). I also learned a lot that is needed to organize APPNA meeting, as co chair and host chapter president during APPNA fall meeting 2017, one of the most well attended fall meeting to date.

I have significant administrative and management experience in my professional life, ran an academic division of more than 30 faculty at University of Cincinnati for four years, currently serving as Professor of medicine, involved in several clinical research projects in Lymphoma, running operations and business of components of large health system, served on BOT of Cincinnati local Islamic school and ran philanthropic fund raising campaigns for national organizations like Leukemia Lymphoma Society.

After the recent turmoil around amendments and the process that is undertaken and how a large division is created in the membership, I felt the only way we can bring reason, tolerance, collegiality, respect for each other and their opinions back to our beloved organization is if we get involved and bring about the change from inside, I hope you will consider me worthy of the role so I can play my part in running this organization as a professional society with equal opportunities for every member.

Summary of APPNA services:
